

# PHILLIP MARDIS

ECRU, MS 38841

6622960705 | P.L.MARDIS@GMAIL.COM

Full-stack developer who is creative, motivated, and ready to integrate into a team of like-minded developers. Core competencies include delivering high-performance, low-cost back end solutions for browser, server, and database while designing and integrating creative, dynamic, and easy to use front end UIs to create effortless and memorable end user experiences.

Fluent in Python and Javascript, as well as the Django Stack. Also, competent with OOP including Java. Adept at utilizing front end scripting along with Bootstrap plus newer, more flexible, un-styled component libraries to create seamless integration of elements while maintaining functionality and accessibility.

Key strengths include communication, both verbal and written, working inside different project organizational structures, with a big emphasis on the Agile framework and Scrum implementation, and flexibility and adaptability, which allows for dynamic shifting between a variety of roles to suit the ever-changing needs of a project.
